Education

B.Eng. in Computer Engineering

McMaster University

Hamilton, Canada

2015 - 2021

Experience

Software Developer Intern

BMO Bank of Montreal - Capital Markets

Toronto, Canada

5/2019 - 8/2019

- Implemented a centralized logging system to be integrated with Splunk, cutting data analysis processing time by 50%
- Worked on the enterprise web platform to enhance ability to view market activity, improving site functionality and reliability
- Utilized JIRA Kanban board for agile project management and followed proper SDLC procedures

Software Developer Intern

BMO Bank of Montreal

Toronto, Canada

9/2018 - 5/2019

- Improved efficiency by automating generation of reconciliation reports using Oracle PL/SQL and UNIX bash shell scripting tools, eliminating over 30 hours of manual work per month
- Strengthened web functionality for the bank's investment firm, demonstrating trust to high profile clients with over \$20MM
- Reported, tracked, and verified issues using JIRA, Confluence, and Veracode

Jr. Developer Co-op

Buckland Customs Brokers

London, Canada

5/2017 - 9/2017

- Developed new features in an ASP.NET environment using JavaScript and C# for an international trade web system used by over 80 major automotive manufacturers including Toyota and GM
- Improved customer website experience by updating existing databases (over 20 TB of entry data and customer information) in Microsoft SQL Server, resulting in quicker load times of analysis reports

Projects

Soil-ent

MHacks 2019 - Winner

University of Michigan

- Real time monitoring of soil health data to a React dashboard. Sensor updates processed through a Flask/Python web server, with data saved in Google's Firebase

Concert Finder

Web systems and design course - CS4WW3

- Fullstack website to view and add local concert arena reviews, utilizing Google Maps API. Implemented with React, Node.js, Express, MongoDB

Recognize

DeltaHacks IV

McMaster University

- Android app that utilizes the device camera to detect and scan words on chemical labels, reading aloud relevant safety information. Built in Java using APIs from Google Vision and text-to-speech technologies

Skills

Languages Python, Java, C#, SQL, HTML, CSS, JavaScript

Technologies Node.js, React, Express, Flask, ASP.NET

Tools Git, Unix, Bash, JIRA
